

Postdoctoral Research Position

The Center for Energy Efficient Electronics Science (E³S) at the University of California, Berkeley, is seeking an outstanding, highly motivated postdoctoral research candidate. The position will be within the Nanophotonics Research Theme of the Center. The successful candidate will have an extensive experience in nano-optoelectronic devices such as lasers, LEDs, photodetectors in III-V or 2-D semiconductors, optical antennas and metal optics. The position is effective immediately, and open for candidates with a Ph.D. (or equivalent degree) in electrical engineering, physics, and materials science.

Applications materials (cover letter, CV, contact information of three references) should be send to Professor Ming C. Wu (wu@eecs.berkeley.edu).

For more information about the Center for E³S, visit www.e3s-center.org.
